

Rhinology Dissection Workshop - Endoscopic Sinus and Skull Base Surgery

Wednesday 7 - Thursday 8 March 2018, Perth, WA

RACS approved for 14 CME points

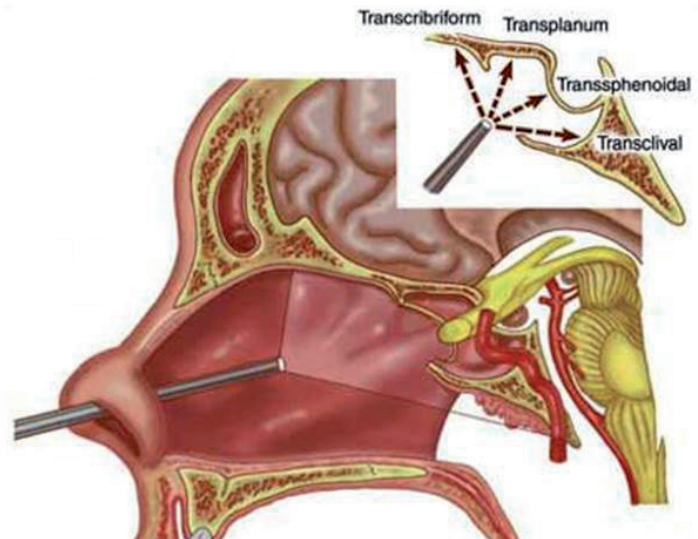

This course will allow for almost two full days' dissection time, following short "how I do it" demonstrations in the lab.

Overview and Learning Outcomes

The course is of particular benefit to consultants and registrars who have developed some experience with basic FESS techniques.

This course aims to provide maximum time to allow unhurried practice and dissection of the modern techniques on:

- radiologic evaluation of the sinuses
- anatomy of the sinuses and the use of landmarks for surgery
- basic surgical endoscopic sinus surgery techniques
- powered instrumentation in sinus surgery
- lacrimal duct surgery
- frontal sinus surgery, including the modified endoscopic lothrop procedure
- advanced endoscopic techniques: CSF leak repair, tumour resection, skull base approaches, and pituitary surgery
- prevention, recognition and treatment of complications of endoscopic sinus surgery
- techniques on making sinus surgery safer
- pre operative and postoperative care of the sinus patient

Convener

Chris Dhepnorarat

International Faculty

Professor Dharambir Sethi

Dr Neville Teo

Australia / New Zealand Faculty

A/Professor Richard Douglas

Professor Richard Harvey

A/Professor Larry Kalish

A/Professor Eng Ooi

A/Professor Alkis Psaltis

Dr Joanne Rimmer

Professor Ray Sacks

Local Faculty

Tim Cooney

Phil Grey

Shane Ling

Venue

The course will be held at the University of Western Australia's CTEC, Perth's cutting-edge advanced surgical skills training facility.

In addition to standard endoscopic equipment, advanced instrumentation will be provided, including several Medtronic FUSION™ electromagnetic Image Guidance systems and Storz skull-base instruments.

Course Venue Address:
CTEC - Clinical Training and Evaluation Centre
The University of Western Australia
35 Stirling Highway, Crawley WA
