

Laryngeal Surgery Course

8:15am – 5:00pm Thursday 21st March 2019 Brisbane, Queensland

pre-ASOHNS 2019 Annual Scientific Meeting

Proudly supported by the Laryngology Society of Australasia, Smith & Nephew & MD Solutions

RACS approved for up to 8 CME points

An update on current best practice in laryngeal surgery and voice restoration.

This is aimed at both consultants and registrars.

The course involves live office-procedure demonstrations, hands-on wet lab and small group lectures with open format.

Learning outcomes:

- Outline current best practice in laryngeal surgery & voice restoration
- Teach techniques for office laryngeal surgery procedures
- To familiarise the participant with optimal larynx and voice assessment in the office
- To experience angiolytic lasers (green light KTP and blue light Wolf) with the chorioallantoic membrane model

Lecturers:

Dr Matthew Broadhurst
Dr Theo Athanasiadis
Dr Elizabeth Hodge
Dr Georgie Harris

Course Venue Address:
Queensland Voice Centre
St Andrews Hospital, level 7 suite 1
St Andrews Hospital
Spring Hill, QLD 4000

ONLY 20 places available

Program Topics:

- Office stroboscopy and assessment
- Laryngeal Office Procedures
- Injection laryngoplasty: GA vs awake
- Management of the airway in theatre
- Angiolytic lasers in laryngology
- Managing the acute vocal fold lesion
- Coblation in the larynx
- Permanent reconstruction for vocal fold paralysis
- Botox uses in laryngology

Demonstration session:

- Videostroboscopy
- Chorioallantoic membrane (CAM) angiolytic laser model
- Office Wolf blue light laser laryngoscopy for dysplasia
- Hands-on CAM model, laser laryngoscopy & injection in ex vivo larynges, Coblation

Q & A

Open forum panel discussion
